PROFESSIONAL SUMMARY

Lead Software Engineer with 8+ years building cloud-native applications at scale using Java, Node.js, React.js, Angular, and Spring Boot. Proven track record architecting microservices on AWS and Google Cloud Platform (GCP) that serve enterprise clients while reducing infrastructure costs by 15% and improving system reliability to 99.9%. Expert in full-stack development, DevOps automation, and leading cross-functional teams to deliver measurable business outcomes including 30% performance gains and 25% velocity improvements.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), TypeScript, Node.js, PHP, SQL, HTML5, CSS3

Frontend: React.js, Redux, Angular, Vue.js, jQuery, Bootstrap, Webpack, Single Page Applications

Backend: Spring Boot, Express.js, RESTful APIs, GraphQL, Microservices, ProcessMaker

Databases: MySQL, MongoDB, Query Optimization, Data Modeling, Indexing Strategies

Cloud & Infrastructure: AWS (S3, SQS, SNS), Google Cloud Platform (GCS, Pub/Sub, Stackdriver), Docker, Kubernetes

CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI, Continuous Deployment, Infrastructure Automation

Testing: JUnit, Mockito, Jest, Mocha, Cypress, Test-Driven Development (TDD)

Monitoring: ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Datadog, Splunk

Security: OAuth 2.0, JSON Web Tokens (JWT), Role-Based Access Control (RBAC)

Tools & Practices: Git, JIRA, Agile/Scrum, Code Review, System Design, Performance Tuning

PROFESSIONAL EXPERIENCE

Lead Software Engineer | *Ultimate Kronos Group (UKG), Bangalore, India* January 2022 - Present

- Lead cross-functional engineering team of 3 developers delivering workforce management solutions, driving 25% velocity improvement and 30% defect reduction through technical mentorship, architecture reviews, and quality engineering practices
- Architect cloud-native microservices using Java Spring Boot and Node.js on Google Cloud Platform with Docker/Kubernetes orchestration, enabling horizontal scaling and achieving 99.9% uptime for Fortune 500 clients
- Spearhead cost optimization initiatives across GCP infrastructure through resource right-sizing and automated scaling policies, reducing monthly spend by 15% (\$45K annually) while maintaining sub-200ms API response times
- Build observability infrastructure with Prometheus and Stackdriver monitoring, proactively detecting incidents and improving mean time to resolution (MTTR) by 40%, resulting in 30% availability gains
- Develop React.js applications with Redux state management and modern UI/UX patterns, collaborating with Product and Design teams to deliver accessible, responsive interfaces serving 50K+ daily active users
- Establish automated CI/CD pipelines via Jenkins and GitHub Actions with comprehensive test coverage (Jest, JUnit, Mockito), reducing deployment cycles from 4 hours to 45 minutes
- Drive Agile transformation and ceremony facilitation (sprint planning, standups, retrospectives), partnering with Product Management and QA to maintain 90%+ sprint completion rates
- Engineer OAuth 2.0 and JWT authentication with role-based access control for multi-tenant SaaS platform, ensuring SOC 2 compliance and enterprise-grade security

Software Engineer | *Pramati Software Private Limited (Acquired by UKG), Bangalore, India* December 2020 - January 2022

- Built RESTful APIs using Node.js and Express.js integrated with ProcessMaker workflow engine, creating real-time analytics dashboards via ELK Stack (Elasticsearch, Logstash, Kibana) that processed 5TB+ monthly log data for data-driven insights
- Championed Test-Driven Development across 3 integration projects with Jest and Mockito, achieving 90% code coverage and 40% bug reduction while optimizing queries and caching to support 10K concurrent users

Software Engineer | *Way2mint Services, Bangalore, India* February 2020 - December 2020

- Developed secure financial communication APIs using Node.js, React.js, and MySQL with rate limiting and comprehensive error handling, boosting customer engagement by 35% and page performance by 40%
- Created messaging template engine with GitLab CI/CD automation, applying database indexing techniques that reduced query latency by 40% for high-volume messaging workflows

Software Engineer | *Hidden Brains InfoTech, Ahmedabad, India* January 2018 - January 2020

- Maintained construction management systems using PHP, JavaScript, and MySQL with real-time tracking capabilities, reducing database response times by 40% through query refactoring and indexing
- Mentored 4 junior developers via code reviews and pair programming, accelerating onboarding and improving code quality metrics by 45%

EDUCATION

Bachelor of Technology in Computer Science and Engineering | Visvodaya Engineering College, Andhra Pradesh, India | August 2014 - August 2018 | CGPA: 7.99/10.0

AWARDS AND RECOGNITION

- **"Star of the Sprint" Award** - Recognized 8 times at Ultimate Kronos Group for exceptional technical execution and sprint delivery
- **3rd Place - Engineering Hackathon** - Placed 3rd in 48-hour innovation challenge demonstrating rapid prototyping and problem-solving
